

How to Login to the VailNet MailFilter

In order to customize the settings for MailFilter, you'll need to login to the MailFilter console.

How-to get to VailNet's MailFilter Login page:

- ▶ Pointer your favorite web browser to <https://MailFilter.vail.net>
- ▶ Click on the WebFilter link on VailNets Homepage.

You should see the following screen. Simply enter your Vailnet, Coloradonet or Mountainmax email address and password to access the Email Filter. For example, if your email address is bingo@vail.net and your password is "mydog" you would enter bingo@vail.net to the right of "Username:", you would enter "mydog" to the right of "Password:" and then you would click on the button marked "Login"..

The screenshot shows the "VailNet Spam Firewall" login interface. It includes a "VAIL NET" logo in the top left, a "VailNet Spam Firewall" title bar, and a "Login" section. The login section contains a text input field, a "Language:" dropdown menu set to "English (US)", a "Username:" field with the placeholder "Your Email Address", and a "Password:" field with the placeholder "Your Email Passwd". Below these fields are "Login" and "Create New Password" buttons. A note at the bottom explains the "Create New Password" function, and a link "Get Mail Client Plugins Here" is provided at the very bottom.

Once you've logged into the Email Filter console you can choose which addresses to allow or block and how you want to personalize the filter.
